🐙 [Github abhishek-0203](#)

A motivated and quick-learning developer passionate about the intersection of AI and software development, continuously learning Kotlin, Golang and Machine Learning to create smart and impactful solutions.

## SKILLS

- **Frontend Development:** Kotlin (Kobweb), ComposeUI, HTML, CSS
- **Backend Development:** Go (Gin Framework), RESTful APIs, JSON data handling, JWT Authentication
- **Database & Storage:** JSON-based storage, basic SQL knowledge
- Basic knowledge of **Machine Learning** and **Deep Learning** concepts
- Familiar with **Scikit-learn**, **Pandas**, **NumPy**, and **OpenCV**
- Skilled in **Prompt Engineering** for AI-driven content, code generation, and problem solving
- Knowledge of **LangChain**, **OpenAI API**, and **Supabase** AI integrations
- Skilled in building interactive, data-driven dashboards using **Power BI** and **Tableau**
- Skilled in **Agentic AI** using **prompt** chaining and tool-integrated automation.
- Basic of **Coroutine**, **Flow**
- Version control with **Git & GitHub**
- **API testing** and **debugging**
- Basic project management exposure (**Jira**, **Asana**)
- Team player with effective communication
- Quick learner, adaptable to new technologies
- Strong problem-solving and debugging skills

## EDUCATION

**B.E in ISE (8.1 CGPA)** - Pursuing  
AMC Engineering College Bangalore , VTU

**10+2 (PCM) (81%)** - July 2019 to May 2021  
St. Francis School (ISC Board)

**10th (All) (80%)** - July 2018 to May 2019  
St. Francis School (ICSE Board)

## LANGUAGE

- Java
- Kotlin
- Golang
- Python
- C

## FRAMEWORK

- Kobweb
- Gin
- Tensorflow
- Django
- PyTorch

## CERTIFICATE/VIRTUAL EXPERIENCE

- JP Morgan Software Engineering Job Simulation on Forage - November 2025  
[Certificate & Credentials](#)

## TOOLS & TECHNOLOGIES

- Android Studio
- VS Code
- GoLand
- Git
- Github
- Postman
- Gen AI
- Lovable
- Tableau
- Power BI

## Project Experience

## Kobweb\_Blog : Full-Stack Technical Blogging Platform

[https://github.com/abhishek-0203/Kobweb\\_BlogMutliplatform.git](https://github.com/abhishek-0203/Kobweb_BlogMutliplatform.git)

**Used Technologies** : Kotlin Multiplatform, Kobweb Framework, Compose for Web, Ktor, MongoDB

It allows users to create, explore, and manage technical blogs under multiple categories – all clean, modern UI and seamless backend integration.

- Developed a full-stack blogging platform with Kotlin Multiplatform and Kobweb, integrating frontend, backend, and database.
- Built a dynamic blogging platform with category, search, and auth modules.
- Implemented REST APIs and MongoDB integration for seamless data management and content persistence.

## DevConnect: Backend Microservices

<https://github.com/abhishek-0203/DevConnect.git>

**Used Technologies** : Golang, Gin Framework, WebRTC, WebSocket, JSON, Dummy Payment

Built a Go-based backend with real-time chat, WebRTC video calls, dummy payments, and modular APIs featuring role-based authentication and JSON-based data handling.

- Built a modular Go backend using the Gin framework.
- Implemented secure role-based authentication with strong validation.
- Developed real-time WebSocket chat with message history.
- Added WebRTC video calls and a dummy crypto payment flow.
- Designed RESTful APIs with JSON-based data handling and full CRUD support.

### Portfolio Website : Personal Branding Site

[https://github.com/abhishek-0203/Kobweb\\_Portfolio.git](https://github.com/abhishek-0203/Kobweb_Portfolio.git)

**Used Technologies** : Kotlin Multiplatform, Kobweb, Compose for Web, Ktor

Responsive portfolio site with contact form, built and deployed using Kobweb and Compose for Web.

- Developed a responsive personal portfolio website to showcase projects, skills, and contact information.
- Integrated a contact form for direct communication using Ktor backend services.
- Designed a clean and modern UI emphasizing performance, accessibility, and responsiveness.

**User Module API** : A backend system that manages all user-related operations

<https://github.com/abhishek-0203/userModuleAPI.git>

**Used Technologies** : Golang , Gin Framework, REST API , JSON

Developed a basic User Management API including Login, Registration, and Profile endpoints.

- Built with Go and the Gin framework using a clean, modular code structure.
- Designed RESTful APIs for smooth frontend integration.
- Tested all endpoints in Postman for reliability.
- Implemented best practices for error handling and JSON responses.
- Added strong input validation for emails and passwords.
